1. [Nanoscale chemistry and mechanical properties of tribofilms on Al-Si alloy \(A383\): interaction of ZDDP, calcium detergent and molybdenum friction modifier](#), G Pereira, A Lachenwitzer, D Munoz-Paniagua, M Kasrai, P R Norton, T W Capehart, T A Perry and Y T Cheng.
2. [Integrated adaptive element free Galerkin model for elastoplastic contact of engineering surfaces](#), Z Zhang, G Liu, T X Liu and Q J Wang.
3. [Experimental simulation of phosphites additives tribochemical reactions by gas phase lubrication](#), D Philippon, M I de Barros-Bouchet, T L Mogne, E Gresser and J M Martin.
4. [Textured surfaces in sliding boundary lubricated contacts - mechanisms, possibilities and limitations](#), U Pettersson and S Jacobson.
5. [Finite element simulation of fretting wear-fatigue interaction in spline couplings](#), J Ding, S B Leen, E J Williams and P H Shipway.
6. [Effects of proteins and pH on tribocorrosion performance of cast CoCrMo - a combined electrochemical and tribological study](#), D Sun, J A Wharton and R J K Wood.
7. [Tribology in biology](#), I C Gebeshuber, M Drack and M Scherge.
8. [Fretting corrosion behaviour of Ti-6Al-4V/PMMA contact in simulated body fluid](#), S Mischler, S Barril and D Landolt.
9. [Quantum mechanochemistry understanding of tribochemical reactions](#), S H Li and V Palekar.
10. [Influence of friction on imperfect conical indentation for elastoplastic material](#), J P Ponthot, W C Guo, G Rauchs and W H Zhang.
